I have shared the private well data with the homeowners, but that is it.

Cheryl Burdett

**Subject:** RE: Update on water testing at Central Sands Dairy in Wisconsin

Has anything been shared outside of EPA?

We have received the results for the five private wells on 5/18/2018. The results from Region 5, CRL Laboratory for Nitrate-Nitrites, Anions, and Total Metals were received between Monday, June 5, 2018 and May 22, 2018. I am still waiting for the laboratory results from the University of Nebraska Laboratory for Nitrates and the N15 isotope. N15 isotope will distinguish between manure and fertilizer.

Sincerely,

Cheryl Burdett

**Subject:** Fwd: Update on water testing at Central Sands Dairy in Wisconsin

Do we know exactly when we will get the results back? We need to talk internally about how the results will be released. Thanks.

Hi Linda, Jeff and I have a regular call with WDNR's press secretary Jim Dick and today he requested a "heads up" (with as much advance notice as possible) about when we expect to get the test results and how we plan to communicate the data to the residents. Do you have an idea of when that might be? I just don't want this to fall through the cracks ...

As you may know, Allison will be

**Ex. 6 Personal Privacy (PP)**

**Ex. 6 Personal Privacy (PP)**

Please keep us posted. We may need to devise a 1-page communication strategy just to make sure we are all singing from the same hymnal. Thank you!
